

... and on pilot-scale wastewater treatment systems:

We are looking for partners that work on:

- N cycling bacteria (nitrifying bacteria) in water and soil
- Green algae and cyanobacteria metagenomics
- CO₂/O₂ production/consumption by bacteria/microalgae
- Testing microalgae-based fertilizer (crop and/or soil conditioner)
- Microelements in soils
- Heavy metals removal by microalgae based technology

Our facilities:

- Excellent chemical and molecular lab facilities
- Controlled lab, bench and pilot scale PBRs (flat-panel, tubular, bubble columns)
- Greenhouses, indoor limnotrons and outdoor mesocosms

Dr. ir. Tania Fernandes, Head of Microalgae eco-technological solutions, Aquatic ecology, Netherlands Institute of Ecology (NIOO-KNAW)
